Art Unit: 1625

DETAILED ACTION

1. New claims 16-22 have been added. Claim 12 has been canceled. Claims 1-11,14-22 are pending.
2. The election of species regarding variable X is withdrawn. The restriction requirement between the compounds and methods of use is maintained. Applicants have canceled the method claims.
3. All claims presented in the amendment dated 8/10/2006 have been examined.

Claim Rejections - 35 USC § 112

4. The rejection of claims 1-3 under 35 USC 112, 2nd paragraph is dropped as the claims have been amended.
5. The rejection of claim 1 under 35 USC, 1st paragraph, is dropped as the proviso has been removed from the claim.
6. Claims 1,16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim contains the terms 'mercapto', 'acid', 'ether' and 'ester', which are ambiguous. The metes and bounds of the terms cannot be ascertained. Mercapto is usually used to designate the presence of sulfur, not to name a substituent.

For example when defining R1, the list uses the terms 'or' and 'and' several times. This is improper Markush format.

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

7. Claims 1,4,10,11,16-18 remain rejected under 35 U.S.C. 102(b) as being anticipated by Gellibert CA 137:169512. Applicant's remarks are noted and are not persuasive. The species according to the invention is RN 446852-67-1. Note R4 may be amine, R1 is 2-bromopyridyl (note R1 may be optionally substituted by halo), X is S. This species does not contain an amino

Art Unit: 1625

substituted pyridyl but rather a bromo substituted pyridyl. It is the last appearing species in the abstract.

8. Claims 1,4,11,16 are rejected under 35 U.S.C. 102(a) as being anticipated by Ogura et al CA 138:338110 that teach species according to the invention. See RN 93366-61-1. Note R4 may be heterocyclic, R1 is pyridyl, and X is O.

9. Claims 1,4,11,16 are rejected under 35 U.S.C. 102(b) as being anticipated by Robl CA 133:296436 that teach species according to the invention. See RN 300656-71-7. Note R4 may be aryl, R1 is pyridyl, and X is O.

10. Claims 1,4,11,18 are rejected under 35 U.S.C. 102(b) as being anticipated by Taurins CA 74:22749 that teach species according to the invention. See RN 30235-32-6; 30235-33-7j 30235-34-8. Note R4 may be amine, R1 is pyridyl, X is S. This compound is outside the proviso as the proviso specifically prevents R1 from being amino-substituted pyridyl not unsubstituted pyridyl.

11. Claims 1,4,11,18 are rejected under 35 U.S.C. 102(b) as being anticipated by Gellibert CA 137:169511 that teach species according to the invention. See RN 446297-60-5; 446297-62-7. Note R4 may be amine, R1 is 1,5-naphthyridin-2-yl (note R1 may be unsubstituted or optionally substituted by alkyl), X is S.

12. Claims 1,4,11,18 are rejected under 35 U.S.C. 102(b) as being anticipated by Gelliart CA 137:169509 that teach species according to the invention. See for example RN 446301-78-6; 446301-80-0; 446301-82-2. Other species are depicted.

13. Claims 2,3,5-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

14. Claims 14,15,19-22 are allowed.
